

NOTICE OF JOB OPENING

Date Posted: 11/19/2019

Position Title: Supply Chain Specialist

Brief Description of Job Duties: Analyzing trends and examining sales, forecast orders for surgical instruments, such as scissors, clamps, needle holders, forceps, and for minimally invasive surgery. Negotiate prices. Subject to approval by management, place orders with producers, especially in Russia and Germany. Ensure that production meets specifications. Attend trade fairs to see what products are entering the market and gaining popularity. Receive feedback from surgeons about ways in which the instruments can be improved. Develop the concept and review the drawings. Outsource the making of a prototype, review its drawings and the prototype itself. Subject to the approval of management, place order for the new or modified surgical instrument. In coordination with a surgical instrument maker, ensure that production meets specifications.
